

Pleising match (crown)

Real wood veneers

Veneer 1

Veneer 2

Veneer 3

Charakteristik

Veneers from different flitches are mix-matched. Harmonious colors and the floral, decorative grain of crown-cut veneers create a lively and natural appearance. By selectively removing extreme colors and grain characteristics, a uniform overall look is achieved. Individual panels may exhibit slight variations in color and structure. Particularly suitable for large wall or ceiling surfaces with higher aesthetic requirements while minimizing material waste.

Attributes

- Decorative, pronounced grain
- Sustainable

Type of grading

Suitable project size

Continuous areas up to 250 m²
