

Slip match (rift, from large format)

Real wood veneers

Veneer 1

Veneer 2

Veneer 3

Charakteristik

Rift veneers from the same flitch are slip-matched. Calm, color-consistent veneers create balanced surfaces, with the same veneer face oriented upwards to prevent visual misalignment of the panels. Distinctive veneer features repeat in the matching pattern. Color variations are emphasized due to the bonding of heartwood and sapwood sides. The grain pattern often runs slightly diagonal. Suitable for small wall and ceiling areas with a calm visual appearance, and less suitable for large surfaces.

Type of grading

Suitable project size

Continuous areas up to 30 m²

Attributes

- Harmonious appearance
- Visible repeat pattern
