

# Book match (rift/quarter, from large format)

Real wood veneers

Veneer 1

Veneer 2

Veneer 3

## Charakteristik

Veneers from the same flitch are book-matched. Each pair of veneer sheets is arranged like the pages of an open book, creating a mirrored effect. With an even number of sheets, a symmetrical overall appearance is achieved. Slight deviations in grain direction are balanced out. The reverse side of the veneer has different technical properties than the face side, which may result in striping or slight color variations when stained or lacquered. Suitable for small wall surfaces with a vertical grain orientation.

## Type of grading

## Suitable project size

Continuous areas up to 30 m<sup>2</sup>

## Attributes

- Symmetrical appearance
- Decorative, pronounced grain
