

Certificate

CO₂ Neutral

By purchasing «**Waterpower Europe**» you are promoting the development of renewable energy sources. This is an important contribution to the preservation of our environment.

Topakustik AG specialises in the development and production of acoustic elements made of wood. The company domicile is in Lungern and is supplied with the following energy sources:

- Thermal energy from a district heating centre, generated from wood chips (residual wood and wood waste from the production of Topakustik AG)
- Electrical energy from European hydropower
- Electrical energy from PV production on the company premises

No other energy sources are used on the site.

In terms of the Greenhouse Gas Protocol (GHG Protocol), Topakustik fulfils the criteria according to Scope 1 and Scope 2 and is considered CO₂ neutral.

The certificate is issued by the energy supplier (EWO) and is **valid until December 31, 2026.**
